

Add hidden SSID in Raspberry Pi

What you should do is just editing file `/etc/wpa_supplicant/wpa_supplicant.conf` and add your WIFI information

```
sudo nano /etc/wpa_supplicant/wpa_supplicant.conf
```

You should add following text

```
ctrl_interface=DIR=/var/run/wpa_supplicant GROUP=netdev
update_config=1
country=GB

network={
    ssid="insert_your_hidden_SSID_here"
    scan_ssid=1
    psk="insert_your_wifi_password_here"
    key_mgmt=WPA-PSK
}
```
