

CDN

A **content delivery network**, or **content distribution network**, is a geographically distributed network of proxy servers and their data centers. The goal is to provide high availability and performance by distributing the service spatially relative to end users

- [CDN77](#) — CDN77 provides relatively cheaper and good CDN service for global market. It covers not only North America and Europe, but also Asian countries like Korea and Hong Kong. If you are considering global content distribution to North America and Europe, CDN77 is a pretty much good option.
- [INXY](#) — Price: USD 1.99 per 1TB = 0.00019 per 1GB
