

Recognize Korean text in string in PHP

```
function recognizeKorean($txt)
{
    // for ANSI string
    if (preg_match("/[\xA1-\xFE][\xA1-\xFE]/", $txt)) return "ko";

    // for UTF8 string
    if (preg_match("/[\xE0-\xFF][\x80-\xFF][\x80-\xFF]/", $txt)) return "ko";

    // otherwise return "en"
    return "en";
}
```
