

Apache settings when GitLab Web IDE does not work under proxypass environment

Followings are the settings I use for my server

```
<VirtualHost *:80>
    ServerName gitlab.its-newid.net

    ProxyRequests    Off
    ProxyVia         Off
    ProxyPreserveHost      On

    <Proxy *>
        Require all granted
    </Proxy>

    ProxyPass / https://192.168.10.8/ nocanon
    ProxyPassReverse / https://192.168.10.8/ nocanon
    AllowEncodedSlashes NoDecode
    RequestHeader set X-Forwarded-Proto "https"
</VirtualHost>

<VirtualHost *:443>
    ServerName gitlab.its-newid.net

    ProxyRequests    Off
    SSLProxyEngine on
    ProxyVia         Off
    ProxyPreserveHost      On

    <Proxy *>
        Require all granted
    </Proxy>

    ProxyPass / https://192.168.10.8/ nocanon
    ProxyPassReverse / https://192.168.10.8/ nocanon
    AllowEncodedSlashes NoDecode
    RequestHeader set X-Forwarded-Proto "https"

    SSLEngine on
    SSLProtocol all -SSLv2 -SSLv3
    SSLCipherSuite HIGH:MEDIUM:!SSLv2:!PSK:!SRP:!ADH:!AECDH
    SSLCertificateKeyFile "cert.key"
    SSLCertificateFile "crt.pem"
    SSLCACertificateFile "cert.ca-bundle"
</VirtualHost>
```
