

libcaption - open source based closed caption

libcaption is a library written in C to aid in the creating and parsing of closed caption data, open sourced under the MIT license to use within community developed broadcast tools. To maintain consistency across platforms libcaption aims to implement a subset of EIA608, CEA708 as supported by the Apple iOS platform.

Origin Source : <https://github.com/szatmary/libcaption>

How to compile

Install build dependencies (git, cmake, a compiler such as xcode, gcc or clang and optionally re2c and ffmpeg)

- run `cmake . && make`
- or to compile without re2c `cmake -DENABLE_RE2C=OFF . && make`
- finally `sudo make install` to install
