We are the Operating System for Global Trade

Technology. Infrastructure. Expertise.

It takes more than dashboards or digital marketplaces to be a true freight forwarding partner. Delivered via our secure cloud software platform, Flexport's Operating System for Global Trade is a unique operating model that combines advanced tech and data analytics, logistics infrastructure, and hands-on supply chain expertise.

Learn More

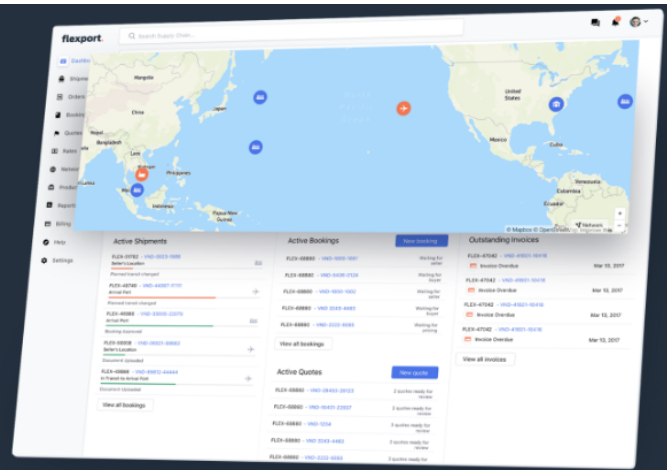

One Platform for You and All Your Suppliers

From booking, communication, and collaboration to reporting, analytics, and more, our intuitive cloud software platform puts everything in one place. So you get control, efficiency, and transparency across your supply chain.

See Our Tech

One Place to Manage Everything

Flexport brings together your team, your suppliers, and our experts to keep everyone on the same page. Your dashboard shows the location of your cargo at every step of its journey in real time. And, with visual alerts and updates from your operations team, you get the visibility you need to take back control of your supply chain.
