# Add a Jira Kanban board to Confluence

Jira Kanban board is super useful tool to manage tasks efficiently. The similar tool popular on internet might be Trello, but its concept may also similar to Kanban if you take a look in detail.

STEP 1. Open confluence URL at <server base url>/admin/viewgadgetdirectory.action?activeTab=gadgetfeeds
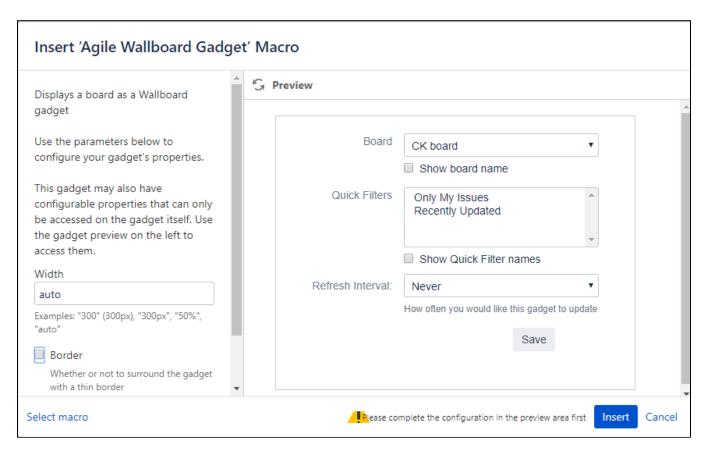

STEP 2. Select "**Gadget Feeds**" and add Jira server URL

Once everything is done, you can put your kanban board on your confluence page. What you should select as macro when you edit is "Agile Wallboard Gadget" like below

Then you will see following popup

Insert 'Agile Wallboard Gadget' Macro

Displays a board as a Wallboard gadget

Use the parameters below to configure your gadget's properties.

This gadget may also have configurable properties that can only be accessed on the gadget itself. Use the gadget preview on the left to access them.
