

GitHub

GitHub is an American company that provides hosting for software development version control using Git. It is a subsidiary of Microsoft, which acquired the company in 2018 for \$7.5 billion.

When using GitHub, you will need to consider using GitHub Desktop for simplifying your development workflow. You can download it at <https://desktop.github.com/>

A screenshot of the GitHub Desktop application interface. The window has a dark theme and a menu bar with 'File', 'Edit', 'View', 'Repository', 'Branch', and 'Help'. The main area is divided into three panes. The left pane shows a list of changes, including 'Appase inter', 'Add event handler to dropdown compon...', 'Move escape behavior to correct compo...', 'Remove event handler from the branches.', 'Merge branch 'master' into esc-pr', 'Merge pull request #4044 from desktop/...', 'Merge pull request #4070 from desktop/...', 'bump to beta3', 'Merge pull request #4057 from desktop/...', 'Merge pull request #4067 from desktop/...', and 'Release to 1.1.0-beta2'. The middle pane shows the commit details for 'Add event handler to dropdown component' by 'ikmWillShepherd and Markus Olsson', with a commit hash of 'c79e71c'. The right pane shows a diff view of the file 'app/src/ul/toolbar/dropdown.tsx', with line numbers 145 to 258. The diff shows changes to the 'ToolbarDropdown' class, including the 'getIsOpen()' method and the 'onMouseDown()' method.
